

**VIII JORNADAS DE LA RED DE CATÁLISIS ASIMÉTRICA (8J\_CASI)**

Hondarribia, 10-11 de Abril, 2024

April 10, Wednesday	
9:15-9:30	Opening
Session 1 (Chairperson: Jose Luis Vicario)	
9:30-10:30	<b>P1. Christoph Scholtes</b> Industrial scale enantioselective hydrogenation using Pfaltz-like catalysts
10:30-11:00	<b>IL1 Martín Fañanás</b> Enantioselective transformation of simple hydrocarbons into multifunctional building blocks
11:00-11:30	Coffee break
Session 2 (Chairperson: José Alemán)	
11:30-12:00	<b>IL2 Antonio Echavarren</b> New Advances in Asymmetric Gold Catalysis
12:00-12:30	<b>IL3 Elena Fernández</b> Contributions to precise skeletal editing via organoboron reactions
12:30-13:00	<b>IL4 Amparo Sanz-Marco</b> Enantioselective Cycloaddition Reactions with Isocyanacetate Esters
13:00-13:30	<b>IL5 Xavier Verdager</b> Asymmetric Reduction of Imines with Cyclometallated Iridium Catalysts
13:30-15:20	Lunch time
Session 3 (Chairperson: Jose María Lassaletta)	
15:30-16:00	<b>IL6 Efraim Reyes</b> Catalytic enantioselective transannular reactions.
16:00-16:30	<b>IL7 Montserrat Diéguez</b> Synergistic approaches to catalyst design: from benchmark to elusive substrates
16:30-17:00	<b>IL8 Israel Fernández</b> The Pauli-Repulsion Lowering Concept in Catalysis
17:00-17:30	Coffee break
Session 4 (Chairperson: Pedro Merino)	
17:30-18:00	<b>IL9 Miquel Costas</b> Enantioselective oxidation of strong C-H bonds with biologically inspired catalysts
18:00-18:30	<b>IL10 Vicente Gotor</b> Gold complexes and enzymes in cooperative catalysis for asymmetric synthesis

April 11, Thursday	
Session 5 (Chairperson: Toni Riera)	
9:00-10:00	<b>P2. Jordi Burés</b> Better Understanding for Better Reactions
10:00-10:30	<b>IL11 Nuria Rodríguez</b> Synthetic strategies for accessing C(sp <sup>3</sup> )-rich scaffolds
10:30-11:00	<b>IL12 Arjan Kleij</b> Asymmetric Synthesis of Small Molecules Featuring Sterically Congested Carbon Stereogenic Centers
11:00-11:45	Coffee break
Session 6 (Chairperson: Félix Rodríguez)	
11:45-12:15	<b>IL13 Aitor Landa</b> New Pronucleophiles and Electrophiles for Asymmetric Organocatalytic Polar Reactions
12:15-12:45	<b>IL14 Ciril Jimeno</b> Metal-templated organocatalytic ligands for the asymmetric aldol reaction: from the proof of concept to a practical catalyst.
12:45-13:15	<b>Asamblea de la red</b>
13:30-15:30	Lunch time

(\*) Plenary lectures: 45 min. + 10 min. discussion. Invited Lectures: 20 min + 10 min discussion.
